Hello All,

This year I will be offering quick tutorial sessions on things that you feel you need to know how to do, in your classroom. This Tuesday, September 4<sup>th</sup> I will be offering a 30 minute session on how to create a template in Word for newsletters & easily input photos from a camera and make the images copier friendly.

If you are interested, come by the tech lab Tuesday 9/2 at 3:45pm.

I will be holding future sessions periodically. If you know of something you would like to learn about, please email me those topics.

Also, on weeks that I am not having tutorials, I will make myself available to you on Monday afternoons. If you plans on coming by please just shoot me a quick email so that I know to expect you.
